2015 WHMIS classification of chemical substances

List in CAS order with english name

The classification list provided in this document was compiled in response to requests for information concerning classifications under federal legislation on hazardous products. Please note that this is not an exhaustive list of hazardous products according to WHMIS 2015.

This classification was established by CNESST personnel to the best of their knowledge based on data obtained from scientific literature and it incorporates the criteria contained in the Hazardous Products Regulations (SOR/2015-17). It does not replace the supplier's classification which can be found on its Safety Data Sheet.

This list contains 2276 products names. You can press on the name of products to obtain their classification.

You can press the name of any product in the list to obtain his WHMIS classification.
